

# DRS's HAMMERDOCK VEHICLE DOCKING SYSTEM

DRS's HAMMERDOCK Vehicle Docking System provides safe, convenient, highly reliable docking in vehicles ranging from bucket trucks to locomotives to fork lifts. It's easy to use and easy to install. To connect the Hammerhead to peripherals, simply place the computer on the stainless steel alignment pins, tilt the unit back, and turn down the retaining latch. Nothing could be easier. DRS's Hammerhead computer can be inserted or removed in seconds using only one hand. Push button key lock provides secure storage when needed. A full complement of standard size connectors provides instant access to practically any combination of peripheral devices.

DRS TACTICAL SYSTEMS

### Features

- Compact design for close spaces
- Build-in noise reduction and surge protection
- No adjustments needed for docking alignment
- Built-in tilt swivel function
- One-piece aluminum body construction for added reliability
- Built-in power conditioner boosts low input voltage for vehicle to ideal charging level
- Built-in keyboard tray with adjustable angle
- Airbag-compliant installation
- Easy to mount with standard bases from all major mount manufacturers

### Docking Station I/O Interfaces

Serial ports . . . . .	2 serial ports
Universal Serial Bus . . . . .	1 USB
Parallel ports . . . . .	1 EPP parallel port
Keyboard . . . . .	2 keyboard connectors

### Hardware/Software Features

Dock construction . . . . .	one-piece aluminum
Surge protection . . . . .	built-in surge protection
Noise reduction . . . . .	built-in noise reduction circuitry
Key lock . . . . .	push-button key lock*
Swivel . . . . .	built-in tilt swivel
Circuit board . . . . .	printed circuit boards
Input voltage range . . . . .	10 - 17 VDC

### Certifications

EMC Directive . . . . .	89/336/EEC
Low Voltage Directive . . . . .	73/23/EEC, CE
